COLLABORATION

SEAI Grant Briefing FOR ARCHITECTS

RDS, Main Hall, Thursday, 12 October 2023

8.00am for 8.30am start – **Tea, coffee and croissants on arrival**

Michael Curran
Moderator: CIBSE Ireland

With home extensions, retrofits and renovations making up a significant proportion of many architects work, it is critical that they fully understand the various grant-aid supports available to their clients from **SEAI**.

Primarily, homeowners are looking for energy savings and greater indoor comfort. They also want sustainable solutions that are affordable, and **SEAI** has a range of grant supports designed to suit all property types and project sizes.

This **SEAI Grant Briefing for Architects at Architecture + Building Expo** (held in tandem with the RIAI Conference) is designed to help architects understand the scope and breadth of the supports available, so they can best advise their clients as to the most appropriate option to apply for.

The format will comprise a brief outline by **Dr Ciaran Byrne, Director National Retrofit, SEAI**, explaining the various grant supports available, followed by a panel discussion and Q&A session. Panel members will include **Henry Sheahan, Chairman, National Insulation Association of Ireland (NIAI)**; **Caroline Ashe Brady, Director, KORE Insulation (One-Stop-Shop provider)**; and **Simon Jones, Air Quality Matters**. Moderator is **Michael Curran, CIBSE Ireland and Head of Building Services, Energy and Utilities at University of Galway**.
